<b>Subject: Computer Networks (01CT0503)</b>	<b>Aim: Configure the router to secure the port and Telnet from unauthorized users. Analyze enable secret and password login commands in detail.</b>	
<b>Experiment No: 04</b>	<b>Date: 17-08-2025</b>	<b>Enrolment No: 92301733024</b>

**Step 1:** Take one router and one PC. Connect a console cable between the router's console port and the PC's RS232 port.

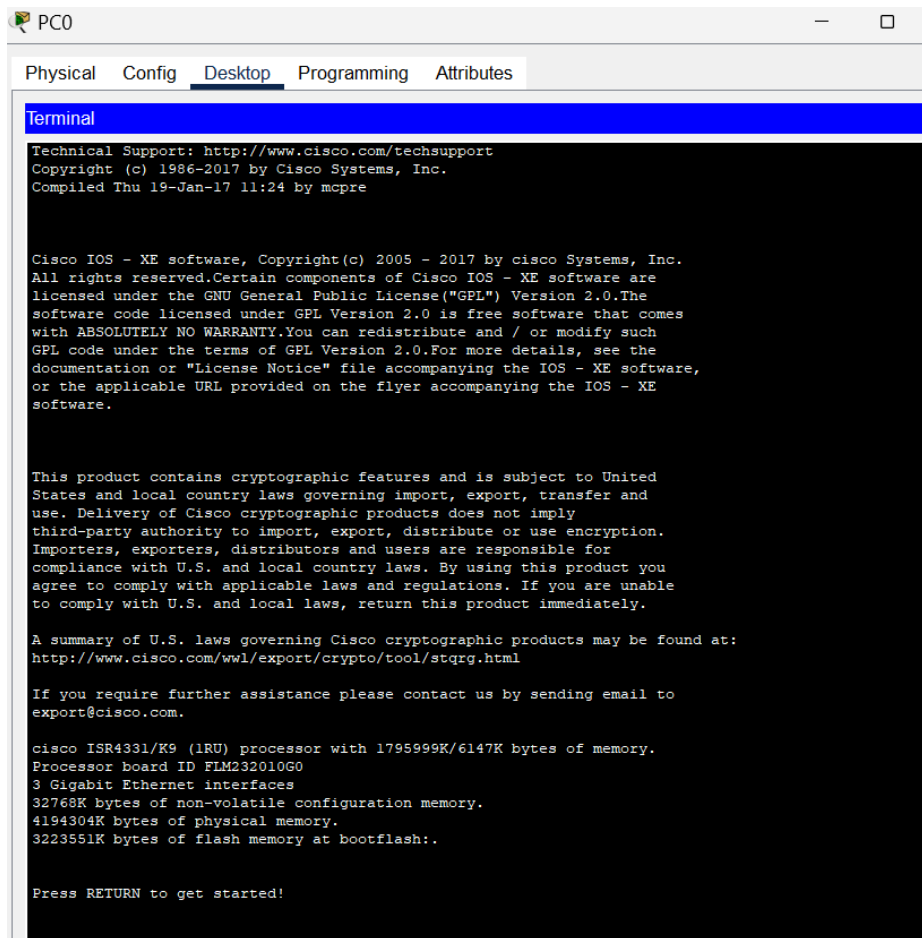

**Step 2:** Click on the PC and go to Desktop. In the Desktop, click on Terminal, and you will see this type of interface.

 <b>Marwadi University</b> Marwadi Chandarana Group	<b>Marwadi University</b> <b>Faculty of Engineering and Technology</b> <b>Department of Information and Communication Technology</b>

<b>Experiment No: 04</b>	<b>Date: 17-08-2025</b>	<b>Enrolment No: 92301733024</b>

**Step 3:** Press OK and you will see the interface.

**Step 4:** To set a password, use the following commands:

### 1. Enable Password

Router(Config)#enable password your\_password

#Copy running-config startup-config

### 2. Login Password or Console Password:

Router(Config)#line console 0

Router(Config-line)#password your\_password

Router(config-line)#login

#Copy running-config startup-config

 <b>Marwadi University</b> Marwadi Chandarana Group	<b>Marwadi University</b> <b>Faculty of Engineering and Technology</b> <b>Department of Information and Communication Technology</b>	
<b>Subject: Computer Networks (01CT0503)</b>	<b>Aim: Configure the router to secure the port and Telnet from unauthorized users. Analyze enable secret and password login commands in detail.</b>	
<b>Experiment No: 04</b>	<b>Date: 17-08-2025</b>	<b>Enrolment No: 92301733024</b>

Let's do this

1. Enable Password

```
Router(Config)#enable password 1234
#Copy running-config startup-config
```

```
Router#conf
Configuring from terminal, memory, or network [terminal]?
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#enable password 1234
Router(config)#exit
Router#
%SYS-5-CONFIG_I: Configured from console by console

Router#Copy running-config startup-config
Destination filename [startup-config]?
Building configuration...
[OK]
Router#
Router#
Router#
```

2. Login Password or Console Password:

```
Router(Config)#line console 0
Router(Config-line)#password abc
Router(config-line)#login
#Copy running-config startup-config
```

```
Router#config t
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#line console 0
Router(config-line)#password abc
Router(config-line)#login
Router(config-line)#
Router(config-line)#exit
Router(config)#exit
Router#
%SYS-5-CONFIG_I: Configured from console by console

Router#Copy running-config startup-config
Destination filename [startup-config]?
Building configuration...
[OK]
Router#
Router#
Router#
```

 <b>Marwadi University</b> Marwadi Chandarana Group	<b>Marwadi University</b> <b>Faculty of Engineering and Technology</b> <b>Department of Information and Communication Technology</b>	
<b>Subject: Computer Networks (01CT0503)</b>	<b>Aim: Configure the router to secure the port and Telnet from unauthorized users. Analyze enable secret and password login commands in detail.</b>	
<b>Experiment No: 04</b>	<b>Date: 17-08-2025</b>	<b>Enrolment No: 92301733024</b>

When you exit, it shows an interface like this:

```
Router(config)#exit
Router#
%SYS-5-CONFIG_I: Configured from console by console

Router#Copy running-config startup-config
Destination filename [startup-config]?
Building configuration...
[OK]
Router#
Router#
Router#exut
Translating "exut"...domain server (255.255.255.255)
% Unknown command or computer name, or unable to find computer address

Router#exit

Router con0 is now available

Press RETURN to get started.
```

First, enter password: abc.  
Then, enable router and enter password: 1234.

```
Press RETURN to get started.

User Access Verification

### **Conclusion:**

In this experiment, we set passwords on the router to protect it from unauthorized access. We added a console password and an enable password so that only people who know the passwords can log in and make changes. This helps keep the router and the network more secure.
